D-MANNOSE - ACTIVE INGREDIENT WITH ANTIBACTERIAL EFFECT

Soluro[®] DUO

Thousands of studies confirm the effect of D-Mannose on E.Coli bacteria

Multicentric double-blind randomized study of **D-mannose** proved that it is **much more effective** than mono cranberry products.

Jesus Salinas-Casado et.al [Efficacy and safety of D-mannose (2 g), 24h prolonged release, associated with Proanthocyanidin (PAC), versus isolate PAC, in the management of a series of women with recurrent urinary infections]. 2018 Mar;71(2):169-177.

In randomized clinical trial **D-Mannose significantly reduced the risk of recurrence of cystitis.**

Bojana Kranjčec et al. D-mannose powder for prophylaxis of recurrent urinary tract infections in women: a randomized clinical trial. 2014 Feb;32(1):79-84.

Mannose receptors are part of the protective mucopolysaccharide layer found on uroepithelial cells lining the urinary tract.

Paul A. Bergamin et al. Non-surgical management of recurrent urinary tract infections in women. 2017 Jul; 6(Suppl 2): S142-S152.

In randomized cross-over trial was confirmed that **D-mannose is safe and effective** for women with cystitis.

D Porru et al. Oral D-mannose in recurrent urinary tract infections in women: a pilot study. January 10, 2014.

D-Mannose	500 mg
Proanthocyanidins (from Vaccinium macracarpon extract)	51 mg (from 170 mg)
Cranberry concentrate	100 mg *cryodesiccated from Vaccinium oxycoccus 10:1
Usage	1 capsule per day
For how many days package is intended?	15
